

CLARIFLOW® WINE

Pleated polyethersulfone (PES) membrane for final filtration of wine and beverages

Extended life and absolute retention efficiency make the Clariflow® Wine product an ideal filter for the clarification of wine. At the heart of this design is a special membrane composed of polyethersulfone (PES). Choosing either the 0.65 or 0.45 µm pore sizes for red and white wines, PES membrane offers superior flow, extended on-stream life, and the consistent removal of microorganisms and particulates.

Clariflow® Wine cartridges are inherently hydrophilic, and contain no added surfactants or wetting agents. The PES membrane also exhibits low color-binding characteristics. Ensures that the filter will not affect the taste of the wine being processed. Each cartridge is manufactured in a certified clean-room environment in accordance with a quality system consistent with the requirements of ISO 9001 certification and guidelines.

BENEFITS

- Extended on-stream life minimizes changeout frequency
- High retention efficiency of yeast and other wine spoilage organisms
- Steam sterilizable/sanitizable for cleaning and reuse
- Integrity testable to ensure complete reliability

APPLICATIONS

Prefiltration/Clarification of:

- Wine
- Beer
- Spirits
- Mineral water

SPECIFICATIONS

Materials of Construction:

Membrane	Polyethersulfone
Support Layers	Polypropylene
Structure	Polypropylene

Operating Differential Pressure:

Forward	80 psid (5.4 bar) @ 75°F (24°C)
	40 psid (2.8 bar) @ 180°F (82°C)
Reverse	50 psid (3.4 bar) @ 75°F (24°C)

Steam Sterilizable and Sanitizable:

Cartridges may be steamed or autoclaved for at least 50 one-hour cycles @ 135°C (275°F). Cartridges may also be hot water and chemically sanitized in place using common sanitizing agents.

Bacteria Retention:

0.65 µm cartridges have been tested to retain *S. cerevisiae* and *P. damnosus*, 0.45 µm cartridges have been tested to retain *L. oenii* and *L. brevis* under conditions typical of those found in the wine industry.

Integrity Test Values: (per 10" cartridges)

FILTER RATING	BUBBLE POINT*		DIFFUSIONAL FLOW		
			FLOW	TEST PRESSURE	
µm	psig	bar	ml/min	psig	bar
0.45	22	1.4	<20	15	1.0
0.65	16	1.1	<20	12	0.9

Tested in deionized water

CLARIFLOW® WINE

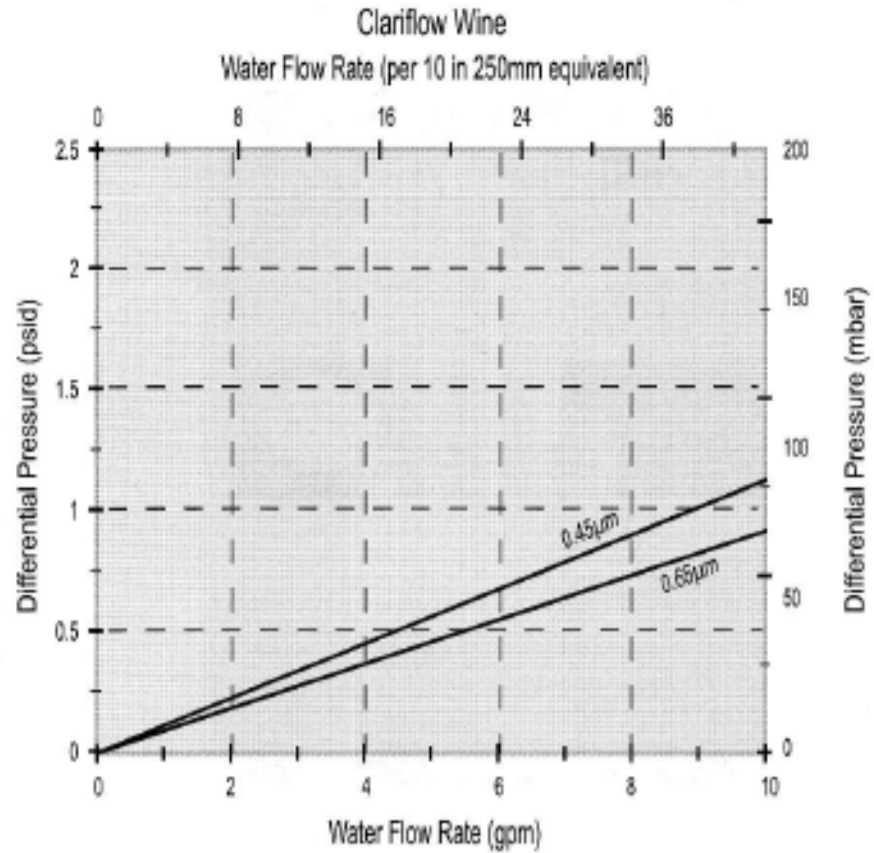

Pleated polyethersulfone (PES) membrane for final filtration of wine and beverages

PERFORMANCE ATTRIBUTES

Liquid Flow Rates*

- 0.45 µm 8 gpm/psid (0.04 lpm/1 mbar)
- 0.65 µm 9.5 gpm/psid (0.05 lpm/1 mbar)

*For fluids with viscosity of 1cP per 10" (250 mm) cartridge equivalent

ORDERING INFORMATION

Insert Style	
CODE	DESCRIPTION
1	No Insert (standard)
5	Encapsulated 316 SS Insert
6	Encapsulated Polysulfone Insert
A*	1/2" Shortened Filter

End Fittings	
CODE	DESCRIPTION
0	DOE (CUNO®)
1	DOE
2	226/Flat
3	222/Flat
6	Ø20/Internal/Flat
7	226/Fin
8	222/Fin

Nominal Length	
CODE	LENGTH (MM)
10	10" (250)
20	20" (500)
30	30" (750)
40	40" (1,000)

All cartridges are 2.75" (690 mm) in diameter.

Filter Rating	
CODE	MICRON
004	0.45 µm
006	0.65 µm

Gasket/O-rings

TECHNICAL SUPPORT AND PRODUCT INFORMATION

Parker provides our customers with unsurpassed product consistency and cost efficiency. Our experienced professionals can help you select the right solution for your application. Orders can be emailed directly to PAFsales@parker.com. For additional information contact your local distributor. Information on product specifications, applications and chemical compatibility can be found on our web site at www.parker.com or through the Oxnard office.

Parker designs and manufactures an extensive line of innovative solutions for specific applications in the Microelectronics, Biopharmaceutical, Food and Beverage, Coatings and Inks, Process and Chemical industries.
