"Q" KIT
 JET FUEL
 QUALITY CONTROL

BULLETIN 87
 (12-01)

THE GAMMON "Q" KIT

A basic self-contained package for the fixed base operator, fueling contractor or private carrier who must perform safety checks on jet fuel. Everything needed to determine the presence of solid contaminants and excess water.

The "Q" Kit Features:

- The Gammon MiniMonitor Kit for contaminant testing per ASTM D 2176. Includes electrostatic bonding and grounding discharge hose assembly.
- Special Tweezers designed for handling delicate filter membranes.
- Color Rating Book meeting ASTM Method D 2176.
- White bucket - 2 gallon or 5 gallon capacity includes grounding rod and level indicator..
- Supply of 48 plastic monitors pre-packaged with filter membranes and support pads.
- Complete record-keeping system featuring filing envelopes with write-on panels, filing pages with pockets and a notebook binder for record - keeping.
- Long term supply of water finding paste

"Q" KIT Number 1 - Model Number GTP-2652-1 includes the following parts:

QTY	P/N	DESCRIPTION
